Portfolio

PROFESSIONAL PROFILE

Engineering Student seeking an internship in additive manufacturing engineering (preferably metal) from February to August 2027
Aspiring Academic Researcher and Lecturer in Materials and Mechanics

PROFESSIONAL EXPERIENCE

ENGINEERING ASSISTANT - LAMSI, ÉTS Montréal (APR. 2026 - AUG. 2026)
Develop and validate a finite element simulation model to evaluate the influence of local grading of the mechanical properties of a NiTi lattice structure fabricated by laser powder bed fusion (LPBF)
Results : Numerical proof of concept validating the mechanical optimization of Nitinol through local property grading, supported by the comprehensive automation of experimental data analysis.
Skills : Numerical modeling, R&D, Scientific methodology, Synthesis skills

OPERATOR INTERNSHIP - SOGEFI SUSPENSIONS, Revigny-Sur-Ornain (FEB. 2025)
Gain exposure to the professional environment and the daily workflow of a production operator for bent stabilizer bars (anti-roll bars) through an internship.
Understand the production system for a component of a vehicle's suspension system, verify product quality, and correct the manufacturing process.
Skills : Rigour, Adaptability, Teamwork

EDUCATION

GENERAL ENGINEERING CYCLE - IMT MINES ALBI (SEPT. 2024 - PRESENT)
Study of scientific theories and practices combining mathematics, mechanics, thermodynamics, energy, chemistry, process engineering, industrial engineering, and computer science.
Specialization in Materials, Mechanics, and the Behavior and Processing of Metallic Materials
Completion of a research project on the feasibility study of fabricating high-value-added cellulosic materials through laser-assisted gelation
Completion of a project to improve the design of a combustion chamber for the CNES PERSEUS project

MASTER'S IN MECHANICS OF MATERIALS AND STRUCTURES - UNIVERSITY OF TOULOUSE, Toulouse (SEPT. 2026 - PRESENT)
Coursework and advanced study in Fracture Mechanics, Photomechanics, Structural Dynamics, and Composite Structures

CPGE (Preparatory Classes for the French Grandes Écoles) - HENRI POINCARÉ, Nancy (SEPT. 2022 - JULY 2024)
Developed scientific rigor in mathematics, physics, and chemistry, with a specialization in Engineering Sciences.
Completed a supervised independent research project on recreating a Wii remote using an accelerometer, a gyroscope, an Arduino board, and Python

SKILLS

Programming languages : Python, Matlab, SQL, LaTeX
Software : SolidWorks, Scilab, nTop, Altair Radioss, Abaqus, Ansys, Dragonfly
Tools : Word, Excel, PowerPoint, Canva
Soft Skills : Autonomy, Communication, Initiative, Knowledge Sharing, Team Management

EXTRA-PROFESSIONAL ACTIVITIES

Sports : Badminton, Handball
Hobby : Digital painting
Other : Former president of the film club at IMT Mines Albi
